SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is amending its regulations in parts 1, 2, 20, 30, 40, 50, 55, 70, 73, and 170 of title 10 of the *Code of Federal Regulations* (10 CFR). The NRC is making these amendments to correct an office title, a reference, a misspelling, and two administrative errors, and to update the street address for the NRC's Region I office.

II. Summary of Changes

10 CFR Parts 1, 20, 30, 40, 55, 70, and 73

Update Street Address. This final rule revises § 1.5(b)(1), appendix D to 10 CFR part 20, § 30.6(b)(2)(i) and (ii), § 40.5(b)(2)(i) and (ii), § 55.5(b)(2)(i), § 70.5(b)(2)(i) and (ii), and appendix A to 10 CFR part 73 to update the street address for the NRC Region I office.

10 CFR Part 2

Correct Office Title. This final rule amends the definition for *Commission Adjudicatory Employee* in § 2.4 by removing the text "Deputy General Counsel for Rulemaking and Policy Support" and adding in its place the text "Deputy General Counsel for Legislation, Rulemaking, and Agency Administration." This change is made to reflect the realignment of the NRC's Office of the General Counsel.

Correct Administrative Error. This final rule amends § 2.101(a)(5) by removing “an application for a construction permit under part 52 of this chapter” and adding in its place “an application for a construction permit under part 50 of this chapter or a combined license under part 52 of this chapter.” Applications for construction permits are governed by 10 CFR part 50 and combined licenses by 10 CFR part 52. This final rule amends § 2.101(a)(5) to correct this error.

10 CFR Part 50

Correct Reference. This final rule amends footnote 1 to § 50.72 by removing the reference “72.216” and adding in its place the references “72.74, 72.75.” Section 72.216 was deleted in a 2003 final rule (68 FR 33611; June 5, 2003), and the immediate notification requirements are currently contained in §§ 72.74 and 72.75.

10 CFR Part 70

Correct Spelling. This final rule amends the introductory text of § 70.61(b) to remove the text “paragraphs” and add in its place the text “paragraphs.”

10 CFR Part 170

Correct Administrative Error. This final rule revises fee categories B and D in table 1 to § 170.21 to conform to a previous rulemaking. The 2007 final rule, “Licenses, Certifications, and Approvals for Nuclear Power Plants” (72 FR 49351; August 28, 2007), added a new § 52.153, “Relationship to other subparts,” to explain how subpart F to 10 CFR part 52 relates to other licensing processes in 10 CFR parts 50 and 52, as well as to the regulatory approvals in 10 CFR part 52. The final rule removed the reference to “preliminary or final” design approvals contained in § 52.153(b) of the proposed rule, inasmuch as the final rule does not provide for preliminary design approvals. Therefore, this final rule makes conforming changes by revising fee categories B and D in table 1 to § 170.21 to remove the references to “preliminary or final” design approvals and replace them with references to “standard” design approvals. Fee category D is further revised to add a comma after the word “Amendment” in “Amendment, Renewal, Other Approvals” for conformity and clarity.

III. Rulemaking Procedure

Under section 553(b) of the Administrative Procedure Act (5 U.S.C.553(b)), an agency may waive publication in the *Federal Register* of a notice of proposed rulemaking and opportunity for comment requirements if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment is unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections or are related only to management, organization, procedure, and practice. Specifically, the revisions correct an office title, a reference, a misspelling, and two administrative errors, and update the street address for the NRC's Region I office. The Commission is exercising its authority under 5 U.S.C. 553(b) to publish these amendments as a final rule. The amendments are effective **[INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*]**. These amendments do not require action by any person or entity regulated by the NRC and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule would not constitute backfitting as defined in § 50.109, "Backfitting," and as described in NRC Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests." These corrections also would not constitute forward fitting as that term is defined and described in MD 8.4 or affect the issue finality of any approval issued under 10 CFR part 52. The amendments are non-substantive in nature, including correcting an office title, a reference, a misspelling, and two administrative errors, and updating the street address for the NRC's Region I office. They impose no new requirements and make no substantive changes to the regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I,

or that would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of this final rule would not constitute backfitting or be inconsistent with any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

V. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111-274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885).

VI. National Environmental Policy Act

The NRC has determined that this final rule is the type of action described in § 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor, nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

VII. Paperwork Reduction Act

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

VIII. Congressional Review Act

This final rule is not a rule as defined in the Congressional Review Act (5 U.S.C. 801-808).

IX. Compatibility of Agreement State Regulations

Under the “Agreement State Program Policy Statement” approved by the Commission on October 2, 2017, and published in the *Federal Register* on October 18, 2017 (82 FR 48535), NRC program elements (including regulations) are placed into

compatibility categories A, B, C, D, NRC, or adequacy category Health and Safety (H&S). Compatibility Category A program elements are those program elements that are basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. An Agreement State should adopt Category A program elements in an essentially identical manner in order to provide uniformity in the regulation of agreement material on a nationwide basis. Compatibility Category B program elements are those program elements that apply to activities that have direct and significant effects in multiple jurisdictions. An Agreement State should adopt Category B program elements in an essentially identical manner. Compatibility Category C program elements are those program elements that do not meet the criteria of Category A or B but contain the essential objectives that an Agreement State should adopt to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State should adopt the essential objectives of the Category C program elements. Compatibility Category D program elements are those program elements that do not meet any of the criteria of Category A, B, or C and, therefore, do not need to be adopted by Agreement States for purposes of compatibility. Compatibility Category NRC program elements are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the Atomic Energy Act of 1954, as amended, or provisions of 10 CFR. These program elements should not be adopted by the Agreement States. Compatibility Category H&S program elements are program elements that are required because of a particular health and safety role in the regulation of agreement material within the State and should be adopted in a manner that embodies the essential objectives of the NRC program. The portions of this final rule that amend 10 CFR parts 20, 30, 40, and 70 are a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among Agreement State and NRC requirements, and are listed in the following table. The changes to 10 CFR parts 1, 2, 50, 55, 73, and 170 categories are

not subject to Agreement State jurisdiction and consequently are not required for compatibility.

³Inspections covered by this schedule are both routine and non-routine safety and safeguards inspections performed by the NRC for the purpose of review or follow-up of a licensed program. Inspections are performed through the full term of the license to ensure that the authorized activities are being conducted in accordance with the Atomic Energy Act of 1954, as amended, other legislation, Commission regulations or orders, and the terms and conditions of the license.
